MILANO

STUARM
MILANO

**A new vision for a
strong collision design.
A sustainable soul
100% made in Italy.**

Un brand dall'anima contemporanea, un viaggio attraverso il mondo del design e attraverso una nuova visione d'impresa. Sturm Milano è una combinazione di forze creative, collisione di energie contrapposte e dirompenti che unendosi creano tempesta, cambiamento e futuro, mantenendo però una naturale anima cristallina.

Sturm Milano dà vita a prodotti dall'anima unica, spaziando dai complementi d'arredo ai sistemi modulari e abbracciando l'intero mondo del life-style indoor e non solo. Sturm Milano è un brand 100% Made in Italy che disegna e produce seguendo tutte le fasi della lavorazione: dall'idea creativa, alla realizzazione dei prototipi in 3D fino ad arrivare al prodotto finito. I materiali utilizzati da Sturm Milano sono riciclabili, atossici e resistenti. La trasparenza e l'unicità di ogni pezzo rendono i prodotti Sturm Milano originali, immediatamente riconoscibili.

A brand with a contemporary soul, a journey through the world of design and through a new vision of enterprise. Sturm Milano is a combination of creative forces, a collision of opposing and disruptive energies that come together to create storm, change and future, while maintaining their natural and crystalline soul.

Sturm Milano creates items with a unique soul, from furnishing complements to modular systems, embracing the whole world of indoor life-style. 100% Made in Italy, Sturm Milano develops and designs following the production in all its different stages: from the creative concept, to the realization of 3D prototypes up to the final product. Sturm Milano materials are recyclable, non-toxic and resistant. The transparency and uniqueness of each piece make Sturm Milano's products original, and immediately recognizable.

Agave, Antonio Aricò - Barock, Sturm Milano

LA ROSA

MILANO 1922

Sturm Milano è una business unit de La Rosa Manichini.
Dal 1922 La Rosa progetta e realizza manichini per i più prestigiosi brand internazionali del calibro di Fendi, Moncler, Etro, Louis Vuitton, Missoni, Roger Vivier, Dior, Valentino, Versace...

Sturm prosegue la produzione dell'eccellenza con il know how centenario de La Rosa.

Sturm Milano is a business unit within La Rosa Mannequins. Since 1922 La Rosa designs and produces mannequins for the most prestigious international brands such as Fendi, Moncler, Etro, Louis Vuitton, Missoni, Roger Vivier, Dior, Valentino, Versace...

Sturm continues the quality productions with the hundred years old experience of La Rosa.

Crepe e increspature sono parte integrante del prodotto. Sono imprevedibili e ogni volta si sviluppano in modo diverso. Non c'è da sorprendersi che i prodotti trasparenti possano presentare delle imperfezioni inaspettate.

Allo stesso modo, colori e dimensioni possono avere delle differenze più o meno significative tra un pezzo e l'altro. Ma STURM è anche questo.

Cracks and ripples are an essential part of the product. They're unpredictable and different every time. It shouldn't be a surprise that the transparent products might come with unexpected imperfections.

In the same way, colours and dimensions might have more or less evident differences between one piece and the other. But that's part of STURM.

Alcuni pezzi possono presentare un foro che utilizziamo nel processo di soffiaggio e verniciatura.
Certain products might present a hole that we use in the process of blow moulding and painting.

PRODUZIONE SOSTENIBILE SUSTAINABLE PRODUCTION

Il polistirene è un materiale non tossico e riciclabile, inoltre la produzione riesce a ridurre al minimo l'impatto ambientale in ogni sua fase. La plastica che utilizziamo è certificata PSV, Plastica Seconda Vita, in quanto proveniente da raccolta differenziata o materiale di scarto. I nostri componenti in legno così come il cartone degli imballaggi è certificato FSC.

Tutti i processi, dal creativo al produttivo, hanno luogo in azienda, a pochi chilometri da Milano. Si parte dallo sviluppo del concept che vede coinvolti team di designer e creativi dal diverso background in collaborazione con il nostro studio tecnico. L'idea iniziale continua poi a prendere forma con le fasi di prototipazione e di stampaggio 3D, a cui seguono il passaggio alla macchina fresatrice e la realizzazione dello stampo. Una volta creato lo stampo, infine, si avvia la fase di produzione vera e propria dell'oggetto.

Everything comes from the research of beauty in the total respect for nature. Sturm Milano is totally eco-friendly: not only the polystyrene is a non-toxic and recyclable material but in addition the production minimizes environmental impact at every step. The plastic we use is certified PSV, Second Life Plastic, as it comes from recycled materials or industrial wastes. Our wooden components as well as the paper used in the packaging is certified FSC.

All processes, from creative to productive, take place in our factory, a few kilometers away from Milan. Here, a team of designers and creatives with different backgrounds develops the creative concept. The idea is then developed into 3D prototypes and printings, followed by the milling machine step and the realization of the mold that will be used for the final production of the items.

I prodotti Sturm nascono da un connubio tra tecnologie di manifattura tradizionali e ricerca e sviluppo di innovative tecniche di produzione. In questo modo siamo in grado di adattarci con flessibilità alle idee più disparate con un approccio preciso ma anticonvenzionale. Seguendo tutte le fasi della produzione, possiamo facilmente modificare i progetti in corso d'opera e garantire la massima libertà di personalizzazione ai nostri clienti assicurandoci la miglior qualità e attenzione alla sostenibilità ad ogni step della produzione.

Sturm products are born from a union of traditional manufacturing technologies and research and development of innovative production techniques. In this way we can adapt to adapt with flexibility to the most different requests with a precise yet alternative approach. By following all of the production phases, we can easily change project while working on them and assure maximum freedom of customisation to our clients while guaranteeing the best quality and care for sustainability in every step of the production.

Fasi di tornitura, trafilatura, stampaggio e verniciatura completamente svolti in azienda.
Turning, extrusion, blow moulding and painting indoor processes.

PRODOTTI PRODUCTS

I prodotti Sturm Milano nascono nella loro versione trasparente. Ogni oggetto può essere, a richiesta, verniciato nei colori selezione Sturm e anche custom-made.

La particolarità del materiale e la sua caratteristica trasparenza non omogenea fanno sì che la resa cromatica del prodotto finito e la tonalità selezionata dalla cartella colore possano sembrare leggermente diverse, conferendo ad ogni oggetto Sturm Milano un aspetto che lo rende un vero unico.

Sturm Milano products are born in their transparent version. Every object can be painted on request in the Sturm and custommade selection colors.

The particularity of the material is its characteristic non-homogeneous transparency ensure that the color rendering of the product finished and the shade selected from the folder color may appear slightly different, giving each Sturm object Milan an aspect that makes it a real one unique.

CURA E MANUTENZIONE CARE AND MAINTENANCE

I prodotti Sturm Milano si collocano principalmente nell'indoor, ma possono essere anche collocati in verande e patii, anche se è sconsigliato un uso prolungato in esterno.

Un impiego non corretto dei prodotti potrebbe provocare eventuali anomalie e/o danni per i quali il processo produttivo e l'azienda sono da ritenere estranei.

Ogni prodotto Sturm Milano deve essere trattato unicamente con detergenti neutri e panni morbidi, mentre per le parti metalliche si consiglia l'utilizzo di prodotti specifici. Sono da evitare in modo assoluto: diluenti, alcool, acetone o prodotti abrasivi e solventi contenenti candeggina o simili.

Ricordiamo inoltre che i prodotti potrebbero presentare difetti e segni non presenti su altri pezzi. Allo stesso modo, anche dimensioni e colori possono variare.

Sturm Milano products are mainly intended for indoor use, but can also be placed in verandas and patios, although long-term outdoor use is not recommended.

An incorrect use of the products could cause possible anomalies and/or damage for which the production process and the company are to be considered extraneous.

Each Sturm Milano product must be treated with neutral detergents and soft cloths only, while specific products should be used for metal parts. Thinners, alcohol, acetone or abrasive products and solvents containing bleach must be avoided.

We remind also that the products might show some defects and marks not present in other pieces. In the same way, dimensions and colours might vary.
